

CE-Clarifier

Chitosan Clarifier + Enzyme

- All-natural formula
- Added enzymes break down and digest non-living organic waste, oils, lotions and sunscreen
- No synthetic additives or dyes
- NSF/ANSI Standard 50 & 60 Certified, non-toxic, non-hazardous

CE-Clarifier is a chitosan-based clarifier that includes Orenda enzymes. It is an all-natural formula with no synthetic additives or dyes.

Chitosan is derived from crustaceans, and in solution possesses a strong positive charge. That positive charge attracts negative charged particles in water that allow the particles to be caught in the filter.

We added our enzyme to the formula for extra strength and the ability to break down oils and other non-living organic waste that clouds pool water, like sunscreen and cosmetics.

**DOSING INSTRUCTIONS*

Initial Dose: Apply four (4) ounces per 10,000 gallons of water, sprayed anywhere on the pool's surface.

Maintenance: Apply one (1) ounce of CE-Clarifier weekly, after the pool has been cleaned and chemistry has been adjusted.

In pools that are cloudy--or using chemicals that cause cloudiness--use up to four (4) ounces per 10,000 gallons of water.

Standard 50 & 60 Certified
